

Environment Policy

Vivosa Apulia Resort is aware that tourist accommodations can exert some pressure on water resources, energy sources and threaten local biodiversity due to inadequate waste management. In this respect, considering the proximity to the coast, the environment is particularly sensitive to anthropogenic impacts, is committed to conducting its business in harmony and respect for the natural aspect to ensure greater safeguards to the community environment. Significant consideration is taken to reduce water consumption, considering the regular emergencies of supplies occurring with increasing frequency in past recent years, especially in Southern Italy. The Management, therefore aims to achieve environmental objectives and targets that allow a constant improvement in environmental performance.

The principles we are committed to support, in order to ensure respect for the environment, are:

1. Pollution prevention and minimization of environmental risks related to the activities and services of the hotel, by every effort, in terms of organization, operation and technology.
2. Maintain at all times its activities in accordance with regulations of the national, regional and local laws.
3. Endure updated information and training activities addressed to all staff on the importance of environmental protection, in order to engage conscious and responsibility of the activities consequently have on the environment policy.
4. Promote the adoption of correct environmental behaviors of suppliers and companies who work on behalf of the organization, encouraging them where necessary, to pertain continuous improvement and additional effective choices in the prevention of pollution.
5. Full communication, transparency and community awareness raising on environment and customers to obtain and consolidate confidence in the activities of its facilities, as well as for a beneficial exchange of tips and advice aimed at improving the environmental performance of the hotel, without renouncing to the needs of our customers.
6. Ensure the commitment of all, in identifying the problems related to environmental management, their control and eventual accomplishment of protection measures.
7. Use, where possible, eco-friendly products.
8. To perform a policy of water energy saving, in line to the conditions of comfort provided by the hotel.
9. To perform a policy of energy saving, in line to the conditions of comfort provided by the hotel.
10. Implement a policy of separate waste collection within the hotel structure and sensitize the same policy to the external waste collection company.
11. Photovoltaic system covering parking areas with a power of 499.50 KW
12. Recharging stations for electric cars.
